Attn: R. Neal Moore

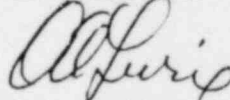

Dear Sirs:

As discussed by phone, we are sending attached two (2) applications of the export of Thorium contained as an impurity max 0.50% in Cerium Fluoride. These applications are for exports to Brazil and Australia up to end December 1984. The quantities of Thorium shown are 0.50% of the total volume of Cerium Fluoride to be exported between now and Dec 31, 1984.

We re-iterate that our interest is in exporting Cerium Fluoride only. The Thorium contained is an impurity in which we have no interest but which the supplier, Molycorp does not remove from the Cerium Fluoride.

Sincerely,

M&T CHEMICALS
