License No. 12-17047-01

Gentlemen:

This refers to the routine safety inspection conducted by Dr. L. W. Shatterly of this office on July 14, 1981, of activities authorized by NRC Byproduct Material use No. 12-17047-01 and to the discussion of our findings with Sharon F. [unclear], R.N., and selected members of your medical staff at the conclusion of the inspection, and a subsequent telephone conversation with Donald C. Burr, M.D. on July 15, 1981.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as specified in enclosed Appendix A. A written response, submitted under oath or affirmation, is required.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. G. Wiedeman, Acting Chief  
Materials Radiation Protection
