Nuclear Regulatory Commission
Washington D.C.

Gentlemen:

STOP LIMERICK - & TURN IT OVER TO COAL FIRED.

I live less than 2 miles from the proposed Limerick Nuclear Power plant and I am quite unhappy with all that has gone wrong so far (that the public knows about). From what I understand Bechtel Power is spending money like a drunken fool with no regard whatsoever for the ratepayers who are footing the bill. They are jobbing out work that I wonder if it is being inspected? and they have had employees known to be on drugs - this is just great when our homes and lives are being endangered because we are going to have to live with this thing! HOW WOULD YOU LIKE TO LIVE NEXT TO IT???

The public had no vote on whether we wanted it in our midst so it is up to YOU to protect the public - and you better do it a dam site better than you have at THREE MILE ISLAND! (We live 60 miles from TMI, 35 miles from Peachbottom, 50 miles from Salem and now 2 miles from Limerick - isn't that asking a little too much).

An alarmed ratepayer,

Byrl Glassmoyer
