

12 July, 1981

U.S. Nuclear Regulatory Commission
Region 5
1990 Northern California Blvd.
Walnut Creek, CA 94596

To Whom It May Concern;

Presently before the Commission is the decision-making of whether or not to grant a licensing for the start up of Diablo Valley Canyon nuclear power plant.

As a California rate-payer and as a United States citizen and taxpayer, I deplore the use of any of my funds for this dangerous and potentially destructive operation.

Since the 1950's we have had more and more accidents, with each one getting worse. I haven't forgotten Three Mile Island, have you? Nor have I put aside the fact that the life of many nuclear power plants are coming to an end now and we still haven't the faintest idea of how to de-commission them safely. And of course, the waste disposal, mining of the fuel and its transportation, and many other facets are also still serious health hazards.

Please don't spend any more of the peoples' money on something that can only destroy them/us.

If you want to do California and United States citizens
justice you'll not approve the Diablo power plant ~~of~~
going nuclear. Stop this nuclear madness before it
stops us. Thank you.

Sincerely,

Susan J. Clark
