Dear Mr. Hendrie:

This is to urge you not to allow the Diablo Canyon Nuclear Power Plant in San Luis Obispo, Ca. permission to conduct low level testing. Once they ~~will~~ have permission for low level testing, the next step will automatically be full operation, which will bring about the problems of nuclear waste disposal and plant security, to name just two. Are you aware that last week, govt. undercover people were able to smuggle in a gun into the plant?

Can you really call it secure?

For the past 10 years, scientists have been predicting a major earthquake in California. How then can you license a plant built on a fault.

Please do your job. Say "no" to big money and protect the public. Do not license Diablo Canyon.
Sincerely,
Ruth O. Johnson
