ATTN: Mr. G. W. Mizer
Manager, Technical Services and
Quality Assurance
North Sandusky Street
Mt. Vernon, Ohio 43050

Gentlemen:

This refers to the QA program inspection conducted by Mr. Ross L. Brown of this office on May 18-21, 1981, of your facility at Mt. Vernon, Ohio and to the discussions of our findings with Mr. C. E. Richardson and members of his staff at the conclusion of the inspection.

This inspection was made to confirm that, in the areas inspected, your QA program, is being effectively implemented. The inspection effort is not designed to assure that unique quality requirements imposed by a customer are being achieved; nor to assure that a specific product, component or service provided by you to your customers, is of acceptable quality. As you know, the NRC requires each of its licensees to assume full responsibility for the quality of specific products, components or services procured from others. You should, therefore, not conclude that the NRC's inspection exempts you from inspections by an NRC licensee or his agents, nor from taking effective corrective action in response to their findings.

Areas examined during the inspection and our findings are discussed in the enclosed report. Within these areas, the inspection consisted of an examination of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, we found no instance where you failed to meet NRC requirements.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room. If this report contains any information that you believe to be exempt from disclosure under 10 CFR 9.5(a)(4), it is necessary that you
