August 4, 1981

Mr. Victor Stollo, Jr.,
Director
Office of Inspection & Enforcement
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stollo:

In his letter of July 29, 1981, Mr. Dieckamp reported to Mr. Dircks that two of our licensed operators had been re-assigned from participation in licensed activities. This reassignment was the result of indications of possible improprieties in the operator license examinations administered at TMI this past April which were identified by the NRC during their grading of the examinations. This letter is to confirm my report to you yesterday that, as a result of the Company's evaluation of information available from efforts to resolve this matter, one of the two individual's employment was terminated yesterday.

As you were previously informed, the other individual has proceeded with long-standing personal plans which have taken him out of the country until the end of this week. Upon his return, we will pursue the Company's evaluation of this matter with that individual and will inform you of the results.

Sincerely,

R. C. Arnold
Chief Operating Executive
