Attn: San Onofre Licensing Proceedings

Gentlemen:

As a concerned citizen I am vitally concerned that the economic, environmental, and social well-being of the State of California be maintained; and an adequate supply of energy is critical to meet these needs.

This nation's continued overdependence on foreign oil has caused major adverse economic impacts, and the situation in the Middle East must be considered a constant threat to our national security.

Regulatory delays in the planning and licensing of needed energy facilities are extremely costly to the consumer, damaging to the environment, and result in continued importation of foreign oil. Therefore, I support the immediate and expeditious licensing of San Onofre Units II and III with all due and deliberate speed.

Sincerely,

Mr. Harold Denton
Director
Office of Nuclear Reactor Regulations
US Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

The licensing of Units 2 and 3 of the San Onofre Nuclear Power Plants is of great importance to all of us. I personally feel that it is urgent that the license be granted without further delay for the following reasons.

- 1) This is a vital element in the economic environment and social well-being of the State of California.
- 2) Concern about an adequate supply of energy that is very critical in meeting the economic and social needs of the State of California.
- 3) The nation's continued use and dependence on foreign oil as a source of energy coupled with the instability of the middle east.

I see the immediate licensing of Units 2 and 3 of the San Onofre Nuclear Power Plants as a partial solution of the long term energy needs of the State of California. Further regulatory delays in issuing a license will undoubtedly add costs to the consumer, business community, cities and towns, as well as State Government.

Therefore, any favorable consideration that can be given to help expedite the licensing of the nuclear power plants by the Commission would be greatly appreciated.

Very truly yours,

Dennis Johnson
President

ATTN: Dr. James Kelley, Chairman

Dear Mr. Kelly

As a public agency/private concern which uses electric energy in providing a vital service/product to the community, we must pass these costs on to our customers. As such, we wish to express our support for the operation of the San Onofre Nuclear Generating Station, Units 1, 2, and 3.

We are vitally concerned that the economic, environmental, and social well-being of the State of California be maintained, and an adequate supply of energy is critical in meeting these concerns. We also feel there must be a strong commitment to conservation of the nation's limited resources and development of efficient and secure new sources of energy.

We strongly urge that you proceed with the timely processing of the operation licenses for the San Onofre Nuclear Generating Station, Units 2 and 3.

Sincerely,

Bill Hendricksen

Office of the Secretary
Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

The Montebello City Council took action at the July 27, 1981, City Council meeting to unanimously support the licensing of San Onofre Units II and III nuclear power plants.

We are concerned about the economic, environmental, and social well being of our community as well as the State of California. We believe in a strong commitment to the conservation of our nation's limited resources and development of efficient and secure new sources of energy.

Therefore, the Montebello City Council supports licensing Unit II and III nuclear power plants while developing alternative forms of energy, such as solar, geothermal and wind.

Very truly yours,

Richard M. Tafoya
Mayor
