Secretary of the Commission  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attn: Docketing and Service Branch

Gentlemen:

The proposed rule published by the Nuclear Regulatory Commission in the Federal Register on July 24, 1981, adding a new Part 61 to 10 CFR, should be revised to more clearly exclude uranium mill tailings and other waste generated in the nuclear fuel cycle from the definition of "waste" found at Section 61.2.

Thank you very much.

Sincerely,

John McMunn  
Assistant Counsel
