

APPENDIX A

NOTICE OF VIOLATION

Jersey Central Power and Light Company
Oyster Creek Nuclear Generating Station
License No. DPR-16

Docket No. 50-219

As a result of the inspection conducted on June 1-30, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 56754 (October 7, 1980), the following violations were identified:

- A. Technical Specification 3.4.C.4 states, in part, "If a pump in the containment spray system or emergency service water system becomes inoperable, the reactor may remain in operation for a period not to exceed 15 days provided the other similar pump is demonstrated daily to be operable. A maximum of two pumps may be inoperable provided the two pumps are not in the same loop..."

Contrary to the above, at 12:35 a.m. on June 8, 1981, one emergency service water system pump in each loop failed to meet the specified acceptance criteria for Surveillance Procedure 607.4.001, Revision 11, August 25, 1980, "Containment Spray and Emergency Service Water Pump Operability Test," and the other similar pumps were not demonstrated daily to be operable, as required.

This is a Severity Level IV Violation (Supplement I.D.).

- B. Technical Specification 6.13.2 states, "Specification 6.13.1 shall also apply to each high radiation area in which the intensity of radiation is greater than 1000 mrem/hr. In addition, locked doors shall be provided to prevent unauthorized entry into such areas and the keys shall be maintained under the administrative control of operations and/or radiation protection supervision on duty."

Contrary to the above, at about 2:00 p.m. on June 16, 1981, the door to the reactor building southwest corner room, an area in which the intensity of radiation is greater than 1000 mrem per hour, was left unlocked with no means of preventing unauthorized entry.

This is a Severity Level IV Violation (Supplement IV.D.).

Pursuant to the provisions of 10 CFR 2.201, Jersey Central Power and Light Company is hereby required to submit to this office within thirty days of the date of this Notice, a written statement or explanation in reply including: (1) the corrective steps which have been taken and results achieved; (2) corrective steps which will be taken to avoid further violations; and (3) the date when full compliance will be achieved. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation. Where good cause is shown, consideration will be given to extending your response time.
