Subject: Virgil C. Summer Nuclear Station
Docket No. 50/395
I&E Bulletin 81-01, Rev. 1

Dear Mr. O'Reilly

In a previous response to IE Bulletin 81-01 dated March 17, 1981, South Carolina Electric and Gas Company committed to performing visual inspections and "push-pull" testing on mechanical snubbers installed on safety related systems during the period July 1, 1981, through August 21, 1981. As a result of scheduling delays these tests have not yet been performed; but will be conducted after Hot Functional Testing and prior to fuel load.

If you have any questions, please call us.

Very truly yours,

for 
T. C. Nichols, Jr.
