Gentlemen:

Subject: Report No. 50-302/81-11

This refers to the routine safety inspection conducted by Mr. T. Stetka of this office on May 26 through June 26, 1981, of activities authorized by NRC Operating License No. DPR-72 for the Crystal River 3 facility. Our preliminary findings were discussed with Mr. T. Lutkehaus, Technical Assistant to the Nuclear Plant Manager and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

During the inspection, it was found that certain activities under your license appear to violate NRC requirements. These items and references to pertinent requirements are listed in the Notice of Violation enclosed herewith as Appendix A. Elements to be included in your response are delineated in Appendix A.

We have examined actions you have taken with regard to previously identified enforcement matters and unresolved items. The status of these items is discussed in the enclosed report.

Three new unresolved items are identified in the enclosed inspection report. These items will be examined during subsequent inspections.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed report will be placed in the NRC's Public Document Room.
