Dear Mr. Haynes:

By your letter dated August 18, 1981, your office forwarded IE Bulletin 81-02, Supplement 1.

This Bulletin and its supplement asked us to address Westinghouse Electro-Mechanical Division motor operated gate valves with respect to Peach Bottom Atomic Power Station. None of the valves of interest are installed, or are maintained as spares for installation in safety-related systems at Peach Bottom Station. In accordance with the instructions enclosed with the Bulletin, no further actions are necessary on our part.

As requested by the August 18, 1981 letter, we have expended approximately 2 manhours in the preparation of this response.

If there are any further questions, do not hesitate to contact us.

Very truly yours,

JW Gallagher
