ORDER

October 27, 1981

On October 19, 1981, David R. Currott, et al., filed a notice of appeal under 10 CFR 2.714a from the October 2, 1981 order of the Licensing Board denying their petitions for leave to intervene in this operating license amendment proceeding involving the Browns Ferry nuclear facility. The notice was accompanied by a motion seeking a three week extension of the time within which to file the brief in support of that appeal. (Under the terms of section 2.714a, the brief was due to be filed along with the notice of appeal.) The NRC staff opposes the extension; the applicant elected not to respond to the motion.

The motion is granted in part. Petitioners' brief is to be filed and served by mail no later than November 2, 1981.
