

DEPARTMENT OF THE NAVY  
COMMANDER  
PACIFIC MISSILE TEST CENTER  
POINT MUGU, CALIFORNIA 93042

IN REPLY REFER TO:

3032  
5100  
Ser L-238  
4 SEP 1981

From: Commander, Pacific Missile Test Center  
To: U. S. Nuclear Regulatory Commission, Division of Fuel Cycle and Material  
Safety, Materials Licensing Branch, Washington, D. C. 20555  
Via: Officer in Charge, Naval Energy and Environmental Support Activity,  
Port Hueneme, California 93043

Subj: Nuclear Regulatory Commission Source Material License No. SUB-1089;  
renewal of

Ref: (a) Source Material License SUB-1089  
(b) Title 10, CFR, Part 40  
(c) OIC NEESA ltr 113S:JAW:1m 3255.3B Ser 802 of 9 Jun 1981

Encl: (1) Form NRC-2, Application for Source Material License

1. By reference (a), the Pacific Missile Test Center was authorized to possess and use up to 9200 kilograms of depleted uranium as ballast in a Ships Motion Simulator Facility on San Nicolas Island. This license will expire on 31 December 1981. Since there is a continuing need for the use of this facility, it is necessary to renew this license.

2. Enclosure (1) is the application for license renewal. As required by reference (b) quadruplicate copies have been provided for Nuclear Regulatory Commission (NRC) use, with a fifth copy for the Naval Energy and Environmental Support Activity. In accordance with reference (c) it is requested that the application be reviewed and forwarded to the NRC for action.

J. M. HICKERSON
