Dear Mr. Crouse:

In our letter to you of May 6, 1980, we forwarded our evaluation of your compliance with Category "A" items of NRC's recommendations resulting from TMI-2 Lessons Learned (NUREG-0578).

In that evaluation, we documented our acceptance of the Davis-Besse Nuclear Power Station, Unit No. 1 design with respect to Item 2.1.3, Dedicated Hydrogen Control Penetrations. Our acceptance of this item in NUREG-0578 also satisfies the requirements of NUREG-0737, "Clarification of TMI Action Plan Requirements," Item II.E.4.1, Dedicated Hydrogen Penetrations, and therefore this item is considered resolved for your facility.

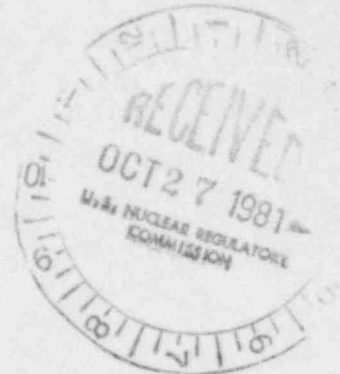

Sincerely,

"ORIGINAL SIGNED BY
JOHN F. STOLZ"

John F. Stolz, Chief
Operating Reactors Branch #4
Division of Licensing
