LTR RICHARDSON DG

Mr. Allan Richardson, Chief Guides and Criteria Branch Office of Radiation Programs U.S. Environmental Protection Agency Washington, DC 20460

Dear Mr. Richardson:

.

In order to document reviews of Remedial Action Plans for the Uranium Mill Tailings Remedial Action (UMTRA) Project, the Nuclear Regulatory Commission staff prepares Technical Evaluation Reports (TERs). These TERs provide the technical basis for the staff's conclusions and identification of any open issues with respect to proposed remedial actions meeting the EPA standards in 40 CFR Part 192.

I have enclosed, for your information, copies of two recently completed TERs. The TER for the Spook, Wyoming site is a rinal document, but the TER for the Belfield/Bowman remedial action is a draft that will be finalized upon completion of our review of the Final Remedial Action Plan. In addition, we have available, should you wish copies, draft TERs for the Lakeview, Grand Junction, and Green River sites, and final TERs for the Riverton, Tuba City, and Durango sites.

In the future, it is our intent to keep your office informed of the status of our reviews by providing you with information copies of our TERs as they are issued. If you have any questions regarding our TERs, please contact me or Daniel Gillen of my staff (492-0517).

Sincerely.

Paul H. Lohaus, Chief **Operations** Branch Division of Low-Level Waste Management and Decommissioning, NMSS
