Subject: Certification of Seabrook Station Unit 1 Technical Specifications

Gentlemen:

Reference (g) transmitted an additional revision to the Technical Specifications for Seabrook Station which were originally provided via References (b), (c) and (e) and certified via References (d) and (f).

New Hampshire Yankee has reviewed the proposed revision and has determined that a change is required. This change is provided in the form of a marked-up page as Enclosure 1.

New Hampshire Yankee has performed a process to certify the Technical Specifications based on a review of the Seabrook Station FSAR through Amendment 62, the NRC Staff's Safety Evaluation Report through Supplement 8, and the plant's as-built condition. To the best of my knowledge and belief, and based on the foregoing, I certify that the proposed Technical Specifications as forwarded by References (b), (c), (e) and (g), with the inclusion of the change provided herein, accurately reflect the as-built plant configuration, the Seabrook Station FSAR through Amendment 62, the NRC Staff's Safety Evaluation Report through Supplement 8, and other docketed correspondence with the Nuclear Regulatory Commission.

Very truly yours,

Ted. C. Feigenbaum
