Dear Mr. Mroczka:

SUBJECT: NRC GENERIC LETTER (GL) 89-13, "SERVICE WATER SYSTEM PROBLEMS AFFECTING SAFETY-RELATED EQUIPMENT," DATED JULY 18, 1989 (TAC NO. 74027)

By letter dated January 25, 1990, you submitted the first of two required responses to the subject generic letter concerning Millstone Unit 3. Noting that you have committed to each of the five recommended actions of GL 89-13, or to an equally effective alternative course of action for one or more of them, we accept your response as fulfilling this requirement of the generic letter.

If you choose a course of action different from the recommended actions of the generic letter, you should document and retain in appropriate plant records a justification that the heat removal requirements of the service water system are satisfied by use of the alternative program.

We look forward to receiving the second of the two required responses to GL 89-13.

Sincerely,

/s/

David H. Jaffe, Project Manager
Project Directorate I-4
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation
