License No.: 34-19089-01  
Docket No.: 030-16055

Dear Ms. Stein:

On March 13, 1990, we issued the inspection report which provides the written results of our January 1990 inspection of AMS' licensed activities. A copy of this report was telefaxed and overnight mailed to you on March 14, 1990. While our normal goal is to provide the inspection report to licensees 7 days prior to the conference, we expedited this process in an effort to accommodate the March 13, 1990 date requested in your telefaxes to me.

The inspection report describes our findings in detail and provides you with a summary list of concerns and apparent violations. This list will serve as the topic list referred to in your March 14, 1990, March 13, 1990 (2 of them), and March 12, 1990 telefaxes to me.

From one of your March 13 telefaxes, it appears that you, Dr. Seymour Stein, and other AMS staff are able to meet with us in an enforcement conference on March 27, 1990, provided you have sufficient time to review the inspection report. Please advise us if this date is still acceptable. If not, please provide us an alternative date.

NRC attendees at the conference will include Mr. A. Bert Davis, Regional Administrator, Bruce Mallett, John Grobe and Wayne Slawinski of the Region III staff, and representatives from our Offices of the General Counsel and Enforcement. We would like to tour the AMS London Road facility at 9:00 a.m. and hold the enforcement conference at 1:00 p.m. in a meeting room in the Holiday Inn near the AMS facility.

Sincerely,

Charles E. Norelius, Director  
Division of Radiation Safety  
and Safeguards

FAX NO.: 708-790-5665

DATE: March 12, 1990

In response to your March 12 fax, we respectfully disagree with your statement implying that AMS has a "significant number of violations."

Secondly, please confirm that you still intend to tour the London Road facility at 9:00 a.m. as previously requested of Attorney Aldrich. Again, these alleged violations are site specific to the facility.

Thirdly, while I am familiar with meetings of this nature, as you are aware, we have never been required to bring AMS's president to any enforcement conference. To the best of his knowledge, Dr. Stein has never attended an enforcement conference, and is therefore totally unfamiliar with the process. Further, he is not involved on a daily basis with the operations of AMS's London Road facility. Therefore, please clarify your reason for requiring his presence at this particular enforcement conference.

We look forward to your response no later than Tuesday, March 13, 1990, with the list of specific topics to be discussed as well as the above-requested information. We would also appreciate some assurance from Region III that it will assist in the clarification of AMS's voluminous license so that this type of confusion does not reoccur. Your prompt response is required due to the short deadline.
