

BEFORE THE UNITED STATES  
NUCLEAR REGULATORY COMMISSION

In the Matter of )  
**NEW YORK POWER AUTHORITY** ) Docket No. 50-333  
James A. FitzPatrick Nuclear Power Plant )

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, the New York Power Authority, as holder of Facility Operating License No. DPR-59, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of this license.

This amendment to the James A. FitzPatrick Technical Specifications proposes a change to Section 4.9.F, "LPCI MOV Independent Power Supplies," (IPS) on page 222a. This change is purely editorial in nature and revises Surveillance Requirement 4.9.F.6 to identify clearly the circuit breakers used for determining IPS operability. These circuit breakers are on the input side of the battery chargers, not the output side as currently indicated.

The proposed change to the Technical Specifications is Attachment I to this Application for Amendment to the Operating License. The Safety Evaluation for the proposed change is included as Attachment II.
