Mr. Barnes,

This refers to your request for a new license dated November 25, 2019. In order to continue our review of your request, the following additional information is needed:

1. Due to the NRC formatting of the license, we will need the maximum source activity and total activity for each sealed source you are requesting on your license.
2. Please provide either of the following:
  - a. A statement that: "Before using licensed material, authorized users will receive the training described in Appendix D of NUREG-1556, Volume 18, Revision 1, 'Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Service Providers'" or
  - b. A description of the training and experience for proposed authorized users.
3. Please provide copies of your operating and emergency procedures for our review.
4. Please explain if you will be using extremity dosimetry during removal and installation of sealed sources and if not, please provide calculations that monitoring of extremity doses is not required.
5. Are there leak check requirements that must be met prior to disconnecting of sealed sources and survey requirements prior to re-installing the sealed sources?

Your reply must be an originally signed and dated letter. The letter may be scanned and submitted as a pdf document attached to an email; or it may be transmitted by facsimile to (610) 337-5269; or it may be sent by regular mail. If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.
