In the Matter of
The Regents of the University of Calif.
(UCLA Research Reactor)
Docket No. 50-142
(Proposed Renewal of Facility License)

Dear Judge Laurenson:

Enclosed please find subpoenas relating to the upcoming Class of License evidentiary hearing. CBG respectfully requests that you authorize issuance of said subpoenas.

The subpoenas relate to reactor operational and financial records which detail the use and cost allocation for the facility. They form the primary documentation upon which the central issue in the upcoming hearing rests: whether the reactor has been used so that more than 50% of the costs are properly attribution to research and education functions. The records are essential for that determination.

CBG has attempted to get the Applicant to voluntarily produce the records in question. Phone discussions were unsuccessful. The Applicant requested the request be made in writing, which CBG did; that request has not been responded to by Applicant by the time indicated, so CBG has no recourse but request a subpoena be issued.

Furthermore, Applicant has indicated that it intends to introduce into evidence, either as an exhibit or in direct testimony, summary of data for the period beginning January 1982. CBG's request to inspect and copy the data summary and the underlying data has, in both parts, been rejected by Applicant, thus necessitating issuance of a subpoena for review of the material prior to hearing. CBG notes that discovery in this matter ended a year ago, so many of the records in question were thus not available.

CBG respectfully requests the subpoenas be issued immediately and express mailed to our Los Angeles office, so that they may be served promptly.

Respectfully submitted,

Daniel Hirsch
