Director of Nuclear Reactor Regulation  
ATTN: Mr. John F. Stolz  
Chief, LWR Branch #1  
Division of Project Management  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Stolz:

Enclosed are seventy copies of the NRC approved edition of BAW-10075A, Rev. 1, "Multinode Analysis of Small Breaks for B&W's 177-FA Nuclear Plants with Raised Loop Arrangement and Internal Vent Valves." This report will be referenced, as necessary, by our customers to support their CP and OL applications.

This NRC Approved Edition has been prepared in accordance with the "Nuclear Regulatory Commission Topical Report Program" forwarded by Mr. A. Schwencer's letter of May 5, 1975.

Very truly yours,

BABCOCK & WILCOX COMPANY  
Nuclear Power Generation
