July 22, 1983
LIC-83-177

Mr. H. R. Denton, Director
U. S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Washington, D.C. 20555

Reference: Docket No. 50-285

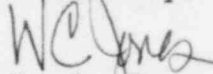

Dear Mr. Denton:

Fort Calhoun Station Unit No. 1
Updated Safety Analysis Report (USAR)

As required by 10 CFR 50.71(e), thirteen (13) controlled copies (numbered 1 through 13) of the "Fort Calhoun Station Unit No. 1 Updated Safety Analysis Report" have been forwarded under separate cover. The annual update encompasses revisions from January 22, 1982 through January 22, 1983. The update was performed to incorporate all plant modifications made to the Fort Calhoun Station and to reflect information and analyses submitted to the Commission since the previous submittal of the USAR. All changes to the USAR received a rigorous technical review, as well as a formal final review and approval by the District's Plant Review Committee. Based upon this review and approval process, the District believes the USAR accurately reflects the design of the Fort Calhoun Station as it existed January 22, 1983.

There have been no changes made under the provisions of 10 CFR 50.59 which have not previously been submitted to the Commission.

Sincerely,

W. C. Jones
Division Manager
