SUBJECT: DAILY HIGHLIGHT

Issuance of Final Design Approval for GESSAR II

On July 27, 1983, the Office of Nuclear Reactor Regulation issued Final Design Approval FDA-1 for General Electric Company's GESSAR II BWR/6 Nuclear Island Design. This approval allows the GESSAR II design to be referenced in operating license applications for plants that referenced the GESSAR-238 Nuclear Island Design Preliminary Design Approval (PDA-1) at the construction permit stage of the licensing process.

FDA-1 is the first Final Design Approval issued by the Office of Nuclear Regulation for a standard nuclear plant design or major portion thereof.
