AMSMC-SF

Mr. Darrell Wiedeman
Nuclear Regulatory Commission, Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Mr. Wiedeman:

Reference is made to our letter dated November 5, 1990. This letter indicated that the results of the radiological analysis of soil samples collected at the site and a decontamination plan would be provided by November 9, 1990.

Analysis of the soil samples taken by Chem-Nuclear Systems, Incorporated, has been completed, and the results are enclosed. The results show a maximum concentration of .75±.36 pico curies per gram.

A draft decontamination plan prepared by Chem-Nuclear Systems, Incorporated, is also enclosed. This plan is currently being staffed in-house at Chem-Nuclear Systems, Incorporated, and the final version will be forwarded as soon as possible. The draft plan is provided for your preliminary review in order to expedite your approval of the final plan. Pending your approval of the final plan, cleanup is tentatively scheduled to begin about December 10, 1990.

The points of contact are Mr. David Skogman, AMSMC-SFS, (309) 782-2962; Mr. Kelly Crooks, AMSMC-SFS, (309) 782-2969; and Mrs. Katheryn LaFrenz, AMSMC-SFS, (309) 782-2965.

Sincerely,

David T. Morgan Jr.

David T. Morgan, Jr.
Colonel, GS
Chief of Staff
