Docket No. 50-202

DEC 0 1975

Northern States Power Company
ATTN: Mr. L. O. Nayer
Director of Nuclear Support
Services
414 Nicollet Mall
Minneapolis, Minnesota 55401

Gentlemen:

The Commission has requested the Federal Register to publish the enclosed Notice of Proposed Issuance of Amendment to Facility License No. DFL-21 for the Monticello Nuclear Generating Plant. The proposed amendment includes a change to the Technical Specifications based on our letter to you dated September 24, 1975.

The amendment would revise the Technical Specifications to (1) add requirements that would limit the period of time operation can be continued with inmovable control rods that could have control rod drive mechanism collet housing failures and (2) require increased control rod surveillance when the possibility of a control rod drive mechanism collet housing failure exists.

Copies of our proposed license amendment with proposed changes to the Technical Specifications also are enclosed. A copy of our Safety Evaluation relating to this proposed action was forwarded to you with our letter dated September 24, 1975.

Sincerely,

Signature of
Dennis L. Ziemann
