LICENSE AMENDMENT REQUEST DATED MAY 5, 1977

PROPOSED CHANGES TO THE TECHNICAL SPECIFICATIONS
APPENDIX A OF OPERATING
LICENSE DPR-22

Pursuant to 10CFR50.59, the holders of the above mentioned license hereby propose the following change to Appendix A Technical Specifications:

Proposed Change

On Page 192, TS 6.1.D, between the existing first and second sentences, insert the following: "The Radiation Protection supervisor shall meet the minimum qualifications in Regulatory Guide 1.8, September, 1975." Please note the other change to Page 192, contained in Exhibit B attached, that was submitted to the NRC on January 31, 1977 and is still undergoing review.

Reason for Change

This is in response to the March 15, 1977 NRC letter from D L Ziemann which requested that we propose a Technical Specification stating the minimum qualifications for the Radiation Protection supervisor.

Safety Evaluation

The minimum qualifications stated in Regulatory Guide 1.8, September, 1975, exceed those required by ANSI N18.1-1971, the latter being referenced in the current technical specification.
