Dear Mr. Cahill:

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION UNIT 2 - LICENSING SCHEDULE

The staff is in the process of scheduling the technical resources needed to complete the regulatory review necessary to support the licensing of Comanche Peak Steam Electric Station Unit 2. To assist us in this effort, you are requested to provide your schedule for the submittal of technical issues that will require staff review and approval. For those issues that will require substantial staff review effort, it would be helpful if you also provide details of the type and amount of changes from what the staff had previously approved for the licensing of Unit 1. We feel that it would be appropriate to hold a meeting on this topic before submitting the requested information on the docket in order to better understand the issues involved and the submittal schedule you intend to provide. Please contact the Project Manager for Unit 2, Mel Fields, at (301) 492-1334, to arrange for such a meeting to be held at the NRC headquarters in Rockville, Maryland.

The reporting requirements contained in this letter affect fewer than ten respondents; therefore OMB clearance is not required under Public Law 96-511.

Sincerely,

Original signed by

George F. Dick, Jr., Acting Director  
Project Directorate IV-2  
Division of Reactor Projects - III/IV/V  
Office of Nuclear Reactor Regulation
