SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit No. 2 ; Docket No. 50-317
Reactor Containment Building Integrated Leak Rate Test Report

Gentlemen:

As required by 10 CFR 50, Appendix J, a successful Unit 2 Containment Building Integrated Leak Rate Test was completed on January 16, 1991. The associated test report is attached.

10 CFR 50 Appendix J requires a separate accompanying summary report if the combined Local Leak Rate Tests (LLRT) fail to meet their acceptance criteria. As the combined LLRTs did not meet the as-found test acceptance criteria, a separate accompanying report is attached as Appendix H.

Should you have any questions regarding this report, we will be pleased to discuss them with you.

Very truly yours,

GCC/PSF/rcj/dlm
