MEMORANDUM FOR: Commissioner Rogers
Commissioner de Planque
FROM: Ivan Selin
SUBJECT: IMPLEMENTATION OF D-RAP FOR THE ABWR AND SYSTEM 80+ APPLICATIONS

The EDO has in his June 30, 1994 memorandum to the Commission addressed the issues raised by the OGC in its May 20, 1994 memorandum on D-RAP. I believe that OGC's recommended action to develop ITAAC would have been the preferred solution were it not for the impact that implementation at this late date would have on the schedules for issuance of the ABWR and System 80+ FDAs.

I propose that for the ABWR and System 80+ FDAs we implement D-RAP as an "applicable regulation" amending Part 52. In addition, the staff should include an ITAAC for D-RAP in the design certification rulemaking for the ABWR and System 80+ design. I also recommend the staff develop an ITAAC for future applications prior to FDA issuance. This should be addressed on a timely basis as the review of these applications proceeds. In order to expedite issuance of the ABWR FDA, response is requested by COB on July 5, 1994.
