

United States Senate

April 16, 1979

Respectfully referred to:

Nuclear Regulatory Commission
Washington, D.C. 20555

Because of the desire of this office to be responsive to all inquiries and communications, your consideration of the attached is requested. Your findings and views, in duplicate form, along with return of the enclosure, will be appreciated by (Please return to the attention of Marsha Wiggin. Thank you.)

Howard M. Metzenbaum
U.S.S.

MM:mwa

Form #2

7910230415 XA

XA Copy Has Been Sent to PDR

- ① Need to answer letter - (See IF will do)
- ② Need to investigate
- ③ In report should include to HQ & letter.

1979 MAR 30 PM 7:54

To Senator Howard Metzenbaum
Dear Sir,

I'm writing this letter
to you out of concern for
the safety of this area of
northeastern Ohio (This is
my home)

I am employed by the
W.F. Kelley Co. at the Perry
Nuclear Plant of C.E.S.
I am a pipefitter

I've only been on this
job a couple of weeks this
time, But the shoddiness
of work being done (pipe
fitting and welding) worries
me. This is not the fault
of the craftsmen, it's either
do it or else for him.

(2)

I've worked on two other nuclear projects before. (Three Mile Island, Harrisburg, Pa. and Peach Bottom near York, Pa.) On both of these jobs the Quality and Thoroughness that was stressed really impressed me especially at Three Mile Island, because I was there the longest and more familiar with the job. There the Hydro testing, the pipe welding (and pipe support welding) and the welding inspection were so thorough and complete that I came to regard this as standard procedure for a Nuclear power project.

And then there's Bruce and from what I've seen, and heard from men who've been on the job much longer than I have

(3)

The attitude of the job seems to be hurry up (Quantity over Quality) do work that you know isn't proper, and if this kind of work is being done where I'm at, Why couldn't it be done on any other part of the project?

And as I said you can't blame the men (craftsmen), for if you don't do as you're told you'll probably be looking for another job.

But the main reason I wrote you Senator is because you seem to be the most concerned and responsive representative we have, And I'm deeply concerned (worried) about the safeness of this Nuclear Plant.

41.3
A. master, maybe you can alert
the N.R.C. or some body
who has the authority or
responsibility above the
local level to see that this
plant is built according to all
proper procedures and will
be safe for all the people
who live in this area.

Sincerely
