Mr. Darrell G. Eisenhut  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Eisenhut:

We are transmitting herein revisions to several emergency preparedness related documents. The changes affect the following document binders:

Radiological Emergency Response Plan - Plant  
Station RERP Implementing Procedures

In the Radiological Emergency Response Plan - Plant, all sections are to be removed and replaced with Issue 3. This document will be updated by individual sections henceforth, and therefore issue numbers will not necessarily be identical for all sections.

In the Station RERP Implementing Procedures, the general format for procedures with worksheets is to file the procedure body under the tab marked with the procedure title, and the worksheets under the tab marked "Attachments," which immediately follows the procedure tab. If a procedure, such as RERP-ORG, contains no attachments for working use, there is no "Attachments" tab. The attachments are separated from the procedure by a blue sheet to assist in filing. The following procedures are being transmitted for filing in the station RERP Implementing Procedures.

CR-ALERT, Issue 14  
RERP-DOSE, Issue 2  
RERP-ECP, Issue 5  
RERP-ORG, Issue 2 (no attachments)  
RERP-PCC, Issue 7  
CR-UE, Issue 15

If there is confusion as to which issue is most recent whenever multiple copies are received in a short period of time, the highest issue number is always the most recent issue of a given procedure.

If difficulties or questions arise in filing these procedures, please feel free to contact Mr. J. M. Sills at (303) 785-2224, extension 283 for assistance.

Very truly yours,

  
Don W. Warembourg  
Manager, Nuclear Production
