DOCS MS-016

Docket Nos. 50-338  
and 50-339

Mr. W. L. Stewart  
Vice President-Nuclear Operations  
Virginia Electric and Power Company  
Post Office Box 26666  
Richmond, Virginia 23261

Dear Mr. Stewart:

SUBJECT: NORTH ANNA 230 KV TRANSMISSION LINE

We have received your submittals dated September 27, 1982 and October 21, 1982 regarding the proposed 230 KV transmission line from the North Anna Power Station to the substation near the town of Louisa, Virginia. Based on our review of the above submittals, we conclude that except as noted below the proposed construction would not affect any of the license conditions of the North Anna Power Station, Units No. 1 and 2 (NA-1&2) Facility Operating Licenses. Accordingly, the staff does not consider that the proposed transmission line would require an amendment to Facility Operating Licenses NPF-4 and NPF-7 for NA-1 and 2 respectively.

However, License Condition 2.F.1. for NA-1 Operating License NPF-4 and License Condition 2.F. for NA-2 Operating License NPF-7 require VEPCO, prior to engaging in any additional construction or operational activities which may result in an environmental impact that was not evaluated by the NRC, to prepare and record an environmental evaluation of that activity and, if the evaluation indicates that such activity may result in significant adverse environmental impact that was not evaluated, or that is significantly greater than that evaluated in the NRC's Final Environmental Statement or its addenda, to provide the evaluation to and receive prior approval from the NRC.

We have reviewed the environmental analysis which VEPCO submitted to the Virginia State Corporation Commission in 1981 as part of its application for amendment of the certificate of public convenience and necessity issued by the SCC, and consider that environmental analysis, together with the previous environmental information submitted to the NRC staff in 1974 and 1976, including your response to staff questions, to fully satisfy the referenced conditions of the NA-1&2 operating licenses with respect to the proposed transmission line. Accordingly, no further

information need be submitted to the staff regarding the proposed construction activity at this time unless the proposed action is modified in such a way as to further invoke the provisions of the referenced conditions of the NA-1&2 licenses.

Sincerely,

Robert A. Clark, Chief  
Operating Reactors Branch #3  
Division of Licensing
