Inspection Summary

Inspection on December 6-10, 1982 (Report No. 50-331/82-20(DETP))

Areas Inspected: Included a review of Security Organization - Management; Security Organization - Personnel; Records and Reports; Testing and Maintenance; Physical Barriers - Protected Area; Physical Barriers - Vital Areas; Access Control - Personnel; Access Control - Packages; Access Control - Vehicles; Detection Aids - Protected Area; Detection Aids - Vital Areas; Independent Inspection Effort; and Followup on Previous Items. The inspection involved 72 inspector-hours onsite by two NRC inspectors. The inspection began during the day shift; six inspection hours were accomplished during the off-shift periods.

Results: The licensee was found to be in compliance with NRC requirements within the areas examined. All previously identified items of noncompliance were found to have been satisfactorily corrected and action taken to prevent recurrence. One previously identified item of concern remains open.
