Dear Mr. Musolf:

SUBJECT: TMI ACTION PLAN ITEMS I.A.2.1 "IMMEDIATE UPGRADING OF REACTOR
OPERATOR AND SENIOR REACTOR OPERATOR TRAINING AND QUALIFICATION"
AND II.B.4 "TRAINING FOR MITIGATING CORE DAMAGE."

We have completed our review of your letters dated December 30, 1980, August 21, 1981, April 16, 1982 and your licensed Operator Requalification Program to the above action items for the Prairie Island Nuclear Generating Plant Unit Nos. 1&2. Your submittals were also reviewed by our Consultant "Science Applications Incorporated (SAI) who finds your responses acceptable except that the plant manager did not receive the prescribed lectures and quizzes called for in action item II.B.4. However, your present manager holds a Senior Operator License and has completed all of the prescribed courses which we find acceptable. In addition you have committed to update your training program for mitigating core damage to reflect future changes to the facilities such as installation of additional instrumentation to detect inadequate core cooling.

Based on the above and the supplemented verification reviews by our Region III (Inspection Report No. 50-282/81-24, 82-04, 82-17; 50-306/81-26, 82-04, 82-17) we conclude that you have provided acceptable programs for upgrading RO and SRO training and for training to mitigate Core damage. Therefore you meet the requirements of action item I.A.2.1 and II.B.4. We consider these items resolved for your facilities.

A copy of our Safety Evaluation with the attached Consultant's report is enclosed.

Sincerely,

Original signed by
