Chicago, Illinois 60608

License No. SNM-1387

70-1430

Gentlemen:

This refers to the routine safety inspection conducted by Mr. J. R. Madera of this office on January 13, 1983, of activities authorized by NRC Special Nuclear Material License No. SNM-1387 and to the discussion of our findings with you during a telephone conversation with Mr. J. R. Madera of the Region III Office on January 14, 1983.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated February 26, 1979, regarding apparent items of non-compliance found during our January 31, 1979, inspection. We have no further questions regarding these matters.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. G. Wiedeman, Chief
Materials Radiation Protection
Section 1
