

DEC 17 1981

MEMORANDUM FOR: Region III Files

TO: Robert F. Warrick, Director, Enforcement and Investigation Staff

FROM: G. A. Phillip, Investigator

SUBJECT: FERRY - CONCERN REGARDING FOUNDATION WORK RECEIVED BY TELEPHONE

On November 25, 1981 I received a telephone call from an individual who stated name was [redacted] said [redacted] lives in the vicinity of the Ferry site and has read recent newspaper articles about problems at the site. [redacted] indicated they aroused concern about some information son gave .

According to [redacted] about three years ago son, now 24 years old, had a conversation in a bar with a man who was working at the Ferry site. The worker said three precast concrete sections used in the foundation of "a big round building" were supposed to be welded or bolted together. Because the trench was too narrow to accomplish the welding or bolting the workers were instructed to fill up the trench without doing it.

[redacted] was advised that more information was needed. [redacted] agreed to talk with son in an effort to obtain more information and, if known, the name of the worker. I said I would contact [redacted] again on Monday, November 30, 1981.

On November 30 I called [redacted] who at that time said [redacted] had spoken to son on Thanksgiving Day, November 26, and son could provide no additional information. son told [redacted] he had never seen the worker before or since their conversation in the bar and he did not know his name.

I informed [redacted] I would discuss the matter with our inspection personnel but that there might not be sufficient information to pursue the matter.

I have since discussed the matter with Frank Hawkins, Acting Chief, Plant Systems Section. Hawkins advised me the information had no relationship

to any foundation work at the site falling under our jurisdiction and that without more details could not reasonably be pursued.

In view of the above, no further action is planned and the matter is considered closed.
