This refers to the inspection conducted by Messrs. M. E. Murphy, R. C. Stewart, and S. L. McCrory of our staff during the period November 15-19, 1982, of activities authorized by NRC facility operating licenses DPR-51 and NPF-6 for Arkansas Nuclear One, Units 1 and 2, and to the discussion of our findings with Mr. J. Levine and other members of your staff on November 19, 1982.

Areas examined during the inspection and our findings are documented in the enclosed inspection report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Consequently, you are required to respond to these violations, in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

One new unresolved item is discussed in paragraph 4 of the enclosed report. This unresolved item addresses a question of the status of a section of the fire protection suppression system.
