Gentlemen:

This refers to the inspection conducted by Mr. Lorenzo Wilborn of this office during the period February 4-8, 1991, of activities authorized by NRC Operating License DPR-34 for Fort St. Vrain, and to the discussion of our findings with Mr. C. H. Fuller, and other members of your staff on February 8, 1991. An update of work activities was conducted between Mr. Wilborn and Mr. Fuller by telephone on February 11, 1991.

Areas examined during the inspection included activities regarding transportation of radioactive material and radiological controls associated with the drilling and cutting of control rods in the hot service facility. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,
