Perry Nuclear Power Plant  
Docket No. 50-440  
Technical Specification Change Request:  
Reactor Vessel Pressure-Temperature  
Limits; Relocation of the Reactor Vessel  
Material Surveillance Withdrawal Schedule

Gentlemen:

Enclosed is a supplement to a previously proposed request for amendment to the Perry Nuclear Power Plant - Unit 1 Operating License. The original request was submitted by letter dated September 14, 1990 (PY-CEI/NRR-1188L) which requested revision of the reactor vessel pressure-temperature limits.

This supplemental request involves removal of the Reactor Vessel Material Surveillance Program - Withdrawal Schedule (Technical Specification Table 4.4.6.1.3-1, pg. 3/4 4-22) from the Technical Specifications, and inclusion of the withdrawal schedule in the PNPP Updated Safety Analysis Report (USAR) as discussed in Generic Letter 91-01. Attachment 1 provides the proposed Technical Specification pages, one of which supersedes a page provided in our previous September 14, 1990 letter. The remaining changes proposed in the September 14, 1990 letter remain valid. Attachment 2 provides the Description of Changes, and the Significant Hazards and Environmental Considerations for this supplement. The Significant Hazards and Environmental Considerations of the September 19, 1990 letter also remain valid, and when combined with the considerations in this letter, fully address this change request.

A companion letter to this Change Request, PY-CEI/NRR-1314 L dated 3/15/91, is being submitted requesting NRC approval of the Withdrawal Schedule in accordance with 10CFR50, Appendix H.

If you have any questions, please feel free to call.

Sincerely,

Michael D. Lyster
