Docket No. 99990001

Non-Licensee

Quantum Products  
ATTN: Hal Laeger  
President  
P.O. Box 1003  
Teaneck, New Jersey 07666

Dear Mr. Laeger:

On March 14, 1994, Mr. Steven Courtemanche of this office conducted a review of your activities involving the distribution of personnel radiation dosimeters. The purpose of the review was to ascertain if NRC licensees were using a non-NVLAP certified supplier of personnel radiation dosimeters. Our review consisted of interviews with personnel and a selective examination of representative records. The findings of the review were discussed with you at the conclusion of our visit.

Sixty-nine of your customers were contacted with the following results:

Sixty-one used equipment that emitted X-Rays and did not have radioactive sources,

Six used equipment with radioactive sources possessed under a general license not requiring personnel monitoring,

One used radioimmuno-assay kits (Iodine-125) under a general license not requiring personnel monitoring, and

One used radioactive material under a specific Agreement State license in a gauge but the license did not specifically require personnel monitoring.
