DIVISION
SPENT FUEL SERVICES OPERATION

GENERAL ELECTRIC COMPANY, 175 CURTNER AVE., SAN JOSE, CALIFORNIA 95125
Mail Code 861

DMD-559

July 1, 1981

Office of Nuclear Material Safety & Safeguards
Attn: L.C. Rouse, Chief
Advanced Fuel and Spent Fuel Licensing
Division of Fuel Cycle and Material Safety
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

The inventory of spent fuel stored at General Electric's Morris Operation Fuel Storage Facility was unchanged during the months of March and April 1981 and was decreased by the shipment of 8 BWR fuel bundles to Dairyland Power Cooperative's La Crosse Boiling Water Reactor during the months of May and June. In addition, a commitment has been made for the storage of fuel from Nebraska Public Power District's Cooper Station, contingent on satisfactory resolution of the Illinois legislation which presently prohibits such storage. Attached is a table showing the current status.

Respectfully,

GENERAL ELECTRIC COMPANY

D.M. Dawson

FUEL STORAGE - EXISTING MORRIS OPERATION SPACE

July 1, 1981

<u>Reactor</u>	<u>In Storage</u>		<u>Under Contract</u>		<u>Reserve Space</u>
	TeU	(Bundles)	TeU	(Bundles)	TeU
Dresden Unit 2	145	(753)			
Connecticut Yankee	33	(80)			
San Onofre	95	(270)	32	(88)	
Point Beach	42	(109)			
Dairyland*	0	(0)			
Cooper			211	(1056)	
Uncommitted	- - - - -	- - - - -	- - - - -	- - - - -	142
Total	315	(1212)	243	(1144)	142

Reserve space is that being used as backup to reactor programs and contingency space. The number of bundles cannot be specified until the reactor source is established.

* Fuel was returned to Dairyland in May and June.
