

August 17, 1981

MEMORANDUM FOR: D. K. Sly, IE

FROM: M. C. Schumacher, Chief, Independent Measurements and Environmental Protection Section

SUBJECT: ALLIS-CHALMERS, GRENDALE WISCONSIN
DOCKET 40-2793, LICENSE SMB-680
DOCKET 70-247, SNM-237

Attached is a copy of information provided by the licensee regarding these licenses. There is no information on them in the Region III file except an entry in an retired license log that SNM-237 expired September 30, 1967. Based on the licensee's information, it appears that both of these licenses were associated with the Allis-Chalmers Critical Facility, License CX-15, Docket 50-108. The record is incomplete on license terminations. There is a record of a fairly extensive survey of the critical facility in August 1966 and again in August 1967 but the fate of materials under the subject licenses is not clear. Also the relationship of this survey to the licensed material in question is not known. Perhaps information available in Headquarters could fill in the blanks in our record. We await your guidance on the need for proceeding further with these licenses.

M. Schumacher

M. C. Schumacher, Chief
Independent Measurements and
Environmental Protection
Section
