

8/7/81

Dear Mr. Chairman

Thank for pushing for stronger safety measures on nuclear power plants. Please, don't rush through nuclear plants licensing without very stringent safety measures. And, hopefully this will lessen the chances of a disastrous accident occurring. Please, push for very stringent safety measures on the Indian point plants and if necessary close close close these plants because an accident there could hurt and kill so many people.

If you find time, please, reply to Guy Bester

sincerely yours,

Ronald Mitchell
