A REASONABLE COMPROMISE SOLUTION

CONVERT DIABLO CANYON

(3 U.S. Nuclear Plants Have Been "Inverted")

A "Nuclear" Diablo is unacceptable to me.

Diablo's projected life-span of 35 years is not reasonable when considering the risks associated with the plant's location (3 miles from the active Hosgri Fault), nuclear waste disposal problems, and iradequate evacuation routes.

I support the blockade if a license is granted.

As a concerned property owner of
Pas Osos, California I ask you to
carefully consider our safety
before you allow Diablo Canyon
Nuclear Plant to be operated.

Because the plant is located near
an active earthquake fault - and there
cannot be a workable evacuation plan
for our community with our present
road condition - it is not safe.

Many of us have put our life savings
in our homes - so please consider what
it would mean to us, to have a nuclear
accident so close to our homes.

-Sincerely,

Helen Wall

(3 U.S. Nuclear Plants Have Been Converted)

A "Nuclear" Diablo is unacceptable to me.

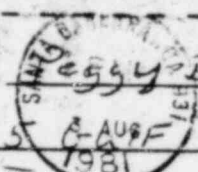

Diablo's projected life-span of 35 years is not reasonable when considering the risks associated with the plant's location (3 miles from the active Hosgri Fault), nuclear waste disposal problems, and inadequate evacuation routes.

I support the blockade if a license is granted.

Nuclear Regulatory Commission:

You must not allow Diablo to be licensed as a nuclear facility! Besides the many dangers inherent in nuclear power (creation of deadly radioactive wastes which must be completely isolated from the environment for hundreds of thousands of years, possibility of a meltdown, sabotage vulnerability, and so on...), the Diablo plant has a list of specific dangers. YOU KNOW the plant was built preposterously close to an active earthquake fault. YOU KNOW the fault is capable of a quake 8-10 times stronger than the plant was designed and built to withstand. YOU KNOW that this county does not have a workable evacuation plan. YOU KNOW that this county does not have adequate medical facilities to handle a nuclear-caused emergency. Because of the specific dangers of Diablo, there are many people in this county opposing the licensing of this nuclear plant who are otherwise pro-nuclear. This is not a pro or anti-nuclear issue. It is a community safety issue! As the agency responsible for regulating nuclear power plants, you are responsible for the safety of our families and community. Please place our health and safety and environmental quality above corporate investment by not allowing Diablo to operate as a nuclear facility.

Sincerely,

Jusan Montpas-Merrill

Blackwood
2017 Albee St.
Walnut Creek, CA 94501

BOOKET NUMBER 50-275,323
PROD. & UTIL. REG. DIV.

1990
Nuclear Regulatory Commission
Attn: Director
California Blvd.
Walnut Creek, CA 94596

Dear Director,

Aug. 6, 1981

I urge you to discontinue the
Diablo Canyon project. It's costliness
to the health and safety to the West
Coast cannot be understated. We cannot
take risks of this size and potential.
You are the watchdogs of the health
and happiness of millions of people,
this nuclear reactor is not foolproof,
there are hazards of unequivocal proportion,
this should automatically rule it infeasible.

Thank you, Hollis Blackwood

South San Francisco, CA 94080

August 4, 1981

Nuclear Regulatory Commission
1990 N. California Blvd.
Walnut Creek, California

Gentlepeople:

Please reconsider your position regarding the
Diablo Canyon nuclear reactor.

It is highly unlikely that the possible power
generated will outweigh either the danger of unauthorized
emissions and leaks, as seen by PG&E's past practices at
Humboldt Bay, or possible disaster due to earthquake, even
in light of the fortifications built by PG&E, which are
still inadequate.

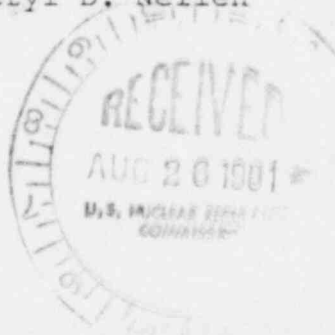

I will be moving to San Luis Obispo with my
husband shortly, and nothing published by PG&E or other
pro-nuclear groups has erased my doubts and fears of disaster
possible and probable at Diablo Canyon specifically.

The push to license Diablo Canyon when so many
people oppose it seems to be financial -- to keep PG&E
happy at the risk of thousands of lives.

PLEASE reconsider the position toward Diablo
Canyon and deny licensing. I do not wish to bring mutants
into the world as a result of nuclear hazards thanks to PG&E's
sloppy management and reluctance in following NRC mandates.

Sincerely,

Cheryl D. Nellen

(3 U.S. Nuclear Plants Have Been Converted)

A "Nuclear" Diablo is acceptable to me.

Diablo's projected life-span of 35 years is not reasonable when considering the risks associated with the plant's location (3 miles from the active Hosgri Fault), nuclear waste disposal problems, and inadequate evacuation routes.

I support the blockade if a license is granted.
