AUG 10 1981

WMUR:JLK  
 Docket No. 40-8745  
 SUA-1396, Amendment No. 2

Ogle Petroleum, Inc.  
 ATTN: Mr. Glenn Catchpole  
 150 North Nichols Avenue  
 Casper, Wyoming 82601

Gentlemen:

Pursuant to Title 10, Code of Federal Regulations, Part 40, Source Material License No. SUA-1396 is hereby amended by deleting License Condition No. 60, and revising License Condition No. 35 to read as follows:

35. The licensee shall, beginning with the commencement of mining operations conduct an environmental radiological monitoring program as specified in Table 4.3 of the FES. In addition, the licensee shall conduct this program using the sampling methods, lower limits of detection, and locations for sample collection points specified in the letter from G. Catchpole, Ogle Petroleum, Inc., to R. Scarano, U.S. NRC, dated July 21, 1981, enclosing the "Bison Basin Project Environmental and Radiological Quality Assurance Program". Furthermore, the licensee shall meet a Lower Limit of Detection for Radon-222 of  $2 \times 10^{-10}$  uCi/ml.

All other conditions of this license shall remain the same.

The effect of deleting License Condition No. 60 is to accept the quality assurance program for the in-plant and environmental monitoring programs submitted by Ogle on July 21, 1981. The effect of revising License Condition No. 35 is to require Ogle to implement the sampling methods, lower limits of detection, and sample location points for their environmental monitoring program as proposed by Ogle in their July 21, 1981 submittal. These revisions were discussed in a August 6, 1981 telephone conversation between your Mr. G. Catchpole and Mr. J. Kotsch of my staff.
