

5/19/81

Docket: 50-285

Omaha Public Power District  
ATTN: W. C. Jones, Division Manager -  
Production Operations  
1623 Harney Street  
Omaha, Nebraska 68102

Gentlemen:

Region IV is in the process of revising our Emergency Response Plan. Part of this revision includes a review of the various methods used by licensees and this office to evaluate accident conditions. One of the areas we are reviewing involves independent evaluations of accident conditions where different values could be reported based on the particular method used in the evaluation.

During August and September 1981, Mr. J. B. Baird of this office will be visiting your facility to review certain aspects of your emergency assessment program. Mr. Baird will review such items as procedures for calculating off-site doses, operating characteristics of monitoring equipment, and the immediate dissemination of data used in the assessment of accident conditions. Mr. Baird will contact the plant operations staff prior to his visit to identify specific members of the staff he will need to meet with.

Your cooperation is appreciated.

Sincerely,

"Original Signed by:  
G. D. BROWN"
