

Nuclear Regulatory Commission
Washington, D.C. 20555

Attn: San Onofre Licensing Proceedings

Gentlemen:

DOCKET NUMBER
PROD. & UTIL. 50-361,362

As a concerned citizen I am vitally concerned that the economic, environmental, and social well-being of the State of California be maintained; and an adequate supply of energy is critical to meet these needs.

This nation's continued overdependence on foreign oil has caused major adverse economic impacts, and the situation in the Middle East must be considered a constant threat to our national security.

Regulatory delays in the planning and licensing of needed energy facilities are extremely costly to the consumer, damaging to the environment, and result in continued importation of foreign oil. Therefore, I support the immediate and expeditious licensing of San Onofre Units II and III with all due and deliberate speed.

Sincerely,

Name

George R. Johnson

Judge James Kelley
Atomic Safety and Licensing Board,
Nuclear Regulatory Commission,
Washington, D.C. 20555

Judge Kelley:

The purpose of this letter is to comment on the licensing of Units 2 and 3 of the San Onofre Nuclear Power Plant.

As one can see from my address I live within 1 mile of the Plant.

I am in favor of the principle of using nuclear power to supplement our existing energy resources such as coal, water, oil, geothermal, solar, etc.

I must trust and believe that the design, construction, operation and management of this and other US nuclear plants is adequate and redundantly safe.

Very Truly Yours,

Paul Gilmore
